Search Notes

Dear Examiner Chung,

Here are the search results for your Fast & Focused search request on case number 10/036140. I flagged the results that looked most relevant, but please review all of the results. Please let me know if you have any questions about these or if you need any further information.

Lucy

Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC2100 and on the EIC2100 NPL Web Page at <http://ptoweb/patents/stic/stic-tc2100.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

(see attached)

STIC Searcher Lucy Park

Phone 28667

Date picked up 3/2/06

Date Completed 3/2/06

Relevant Claim: claim 1.

Description:

The technology is a combination of

(1) SCTP (communication protocol)

(2) A software implementation to support SCTP,

The software application involves storing multiple IP addresses (of one of two ends of a communication path) that are provided in SCTP.

Two copies of the application, each on a separate machine, exist in the same network.

The applications are synchronized.

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 2133

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

ISBN: 3 540 00732 6 Material Identity Number: XX-2002-03507

Conference Title: CIC2002 - 7th CDMA Int. Conference

Conference Date: 29 Oct.-1 Nov. 2002 Conference Location: Seoul, South Korea

Language: English Document Type: Conference Paper (PA)

Treatment: Practical (P)

Abstract: This paper proposes enhanced **failover** for the Diameter-based AAA system. The Diameter application layer watchdog algorithm enables **failover** from a server that has failed. **Sctp** heartbeat is used to perform **failover** between interfaces. This paper adopts both of them to provide efficient **failover** by inspecting the state of connection with the peer as well as the state of the Diameter application of the peer. The proposed **failover** method that enables the Diameter node to use an alternative server as well as alternative communication path provides flexible and efficient **failover** to the Diameter node. ...SPECIFICATION protocol SCTP layer supports a SCTP association between SCTP endpoints. Each SCTP endpoint has a **list** of transport **addresses** assigned thereto - e.g., multiple IP addresses - to receive or originate **SCTP** user protocol data packets. An **SCTP** association spans transfers over all the possible source address/destination address combinations that may be generated between two **SCTP** endpoints in view of the related **list** of transport **addresses** illustrated as subdivided rectangles in Fig. 3. An **SCTP** association is initiated on request of the signaling endpoint and maintained permanently and allows to link two **SCTP** endpoints via multiple routes. Such a link of two **SCTP** endpoints supports an **SCTP** signaling stream as non-permanent signaling data exchange via an **SCTP** association for control processes.

In the following, a peer signaling association is referred to as...

...SPECIFICATION of link changeover procedures set forth hereinbelow.

Pursuant to the formation of an association, each **SCTP** endpoint provides the other endpoint with a **list** of transport **addresses** (e.g., one or more IP addresses in combination with an **SCTP** port) through which that endpoint can be reached and from which it will originate **SCTP** packets. The association spans transfers over all of the possible source/destination combinations which may be generated from each endpoint's lists. Additional details regarding **SCTP** architecture may be found in the work in progress Internet Draft identified as <draft-ietf-sigtran-**sctp**-13.txt> which is incorporated by reference herein.

Continuing to refer to FIG. 5A, a...

...SPECIFICATION between each SGP and ASP.

Protocol extensions and procedures have been proposed for implementing a **fail - over** mechanism between Stream Control Transfer Protocol (**SCTP**) associations connecting processes in the Application Servers and processes in the Signalling Gateways. They are defined by the IETF in a draft "Correlation Id and Hearbeat Procedures (CORID) Supporting Lossless **Fail - Over** between **SCTP** Associations for Signalling User Adaptation Layers" available from the IETF website at www.ietf.org. This **fail - over** mechanism requires both sides of the associations namely the AS and SG to use a...

Relevance scale ☐ ☐ ☐ ☐ ☐1 [Open base situation transport \(OBAST\)architecture](#)

Phillip D. Neumiller, Peter L. Lei, Michael L. Needham

July 2000 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 4 Issue 3

Publisher: ACM Press

Full text available: pdf(1.08 MB)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

This paper outlines the requirements for a set of open IP based protocols enabling seamless mobility across diverse radio access networks. We begin by stating some architectural tenets upon which the requirements for the OBAST protocol set are based. Furthermore, what the authors currently believe to be the eventual desirable wireless Internet architecture is described. This architecture is shown to enable a common protocol set that we refer to as the open base station transport (OBAST) protocol ...

Henning Schulzrinne, Elin Wedlund

July 2000 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 4 Issue 3

Publisher: ACM Press

Full text available: pdf(1.34 MB)

Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

Supporting mobile Internet multimedia applications requires more than just the ability to maintain connectivity across subnet changes. We describe how the Session Initiation Protocol (SIP) can help provide terminal, personal, session and service mobility to applications ranging from Internet telephony to presence and instant messaging. We also briefly discuss application-layer mobility for streaming multimedia applications initiated by RTSP.

3 [Special issue on wireless extensions to the internet: Interworking internet telephony and wireless telecommunications networks](#)

Jonathan Lennox, Kazutaka Murakami, Mehmet Karaul, Thomas F. La Porta

October 2001 **ACM SIGCOMM Computer Communication Review**, Volume 31 Issue 5

Publisher: ACM Press

Full text available: pdf(1.09 MB)

Additional Information: [full citation](#), [abstract](#), [references](#)

Internet telephony and mobile telephony are both growing very rapidly. Directly interworking the two presents significant advantages over connecting them through an intermediate PSTN link. We propose three novel schemes for the most complex aspect of

the interworking: call delivery from an Internet telephony (SIP) terminal to a mobile telephony (UMTS) terminal. We then evaluate the proposals both qualitatively and quantitatively. However, existing equipment may not support packet interfaces n ...

4 Dynamic vectorization: a mechanism for exploiting far-flung ILP in ordinary programs

Sriram Vajapeyam, P. J. Joseph, Tulika Mitra

May 1999 **ACM SIGARCH Computer Architecture News , Proceedings of the 26th annual international symposium on Computer architecture ISCA '99**, Volume 27 Issue 2

Publisher: IEEE Computer Society, ACM Press

Full text available: [pdf\(103.41 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)
[Publisher Site](#)

Several ILP limit studies indicate the presence of considerable ILP across dynamically far-apart instructions in program execution. This paper proposes a hardware mechanism, *dynamic vectorization (DV)*, as a tool for quickly building up a large logical instruction window. Dynamic vectorization converts repetitive dynamic instruction sequences into vector form, enabling the processing of instructions from beyond the corresponding program loop to be overlapped with the loop. This enables vec ...

5 Streaming 2: ReMDoR: remote multimedia document retrieval over partial order transport

Phillip T. Conrad, Armando Caro, Paul Amer

October 2001 **Proceedings of the ninth ACM international conference on Multimedia**

Publisher: ACM Press

Full text available: [pdf\(1.41 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper presents results from performance experiments that demonstrate and quantify performance improvements when a PO/R transport service is used instead of an ordered/reliable service (O/R e.g., TCP) or an unordered/unreliable service (e.g. UDP). We first describe the *Remote Multimedia Document Retrieval system (ReMDoR)*, an experimental application developed by the authors to evaluate the performance of remote document retrieval over a variety of transport protocols. We then provide ...

Nothing Found

Your search for **+sctp failover* fail()over*** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a + if a search term must appear on a page.

museum +art

- Exclude pages by using a - if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago
